

How will Sydney power itself into the future?

THE GEOLOGICAL SOCIETY OF AUSTRALIA WILL ASK SYDNEY IF IT IS READY TO TACKLE ALTERNATIVE ENERGY.

ABC science journalist and broadcaster, **Robyn Williams**, will moderate a 'Q & A' style discussion with a panel of leading scientists and engineers at the **Powering Sydney into the Future: the Science of Alternative Energy Public Forum**.

Prof. Mary O'Kane
NSW Chief Scientist and Engineer. In 2013 Prof. O'Kane was directed by the NSW Government to conduct a comprehensive review of CSG-related activities, focusing on the human health and environment impacts.

Prof. Ben Hankamer
University of Queensland, founding director of the Solar Biofuels Consortium which is developing high-efficiency micro algal biofuel production systems.

Dr Gary Ellem
Tom Farrell Institute, University of Newcastle. His recent work has focussed on modelling the scale and economics of alternative energy, sequestration and land management systems, as well as the development of innovative biomass technologies such as microalgae.

Tony Irwin
Technical Director SNR Nuclear Technology with more than 40 years of experience with nuclear reactors. He is currently the Chairman of Engineers Australia Nuclear Engineering Panel and a visiting lecturer for the Masters of Nuclear Science course at Australian National University.

Scientia Professor Deo Prasad AO
Chief Executive Officer CRC for Low Carbon Living Ltd. He is an international authority on sustainable buildings and cities and among the leading advocates for sustainability in Australia

DATE: Monday 17 August
TIME: 6:30pm – 8:30pm
LOCATION: The Wesley Conference Centre, 220 Pitt Street, Sydney
